Education

University of Washington - Seattle, WA Sept 2023 - Jun 2026

B.Sc. in Earth and Space Sciences: Geosciences, with Departmental Honors

- 3.52 GPA
- Minor: Data Science
- Dean's List: Full Year 2025, Summer 2024, Winter 2024

University of California, Santa Barbara - Santa Barbara, CA Sept 2022 - Jun 2023

Research Experience

Undergraduate Researcher - Δ^* IsoLab Sept 2024 - Present

Advised by Dr. Katharine Huntington - University of Washington

- Investigated $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ isotopic variability and the petrography of lacustrine carbonates to determine biological and climatic influences on the stable isotope record and depositional patterns in the Colorado Plateau.
- Awarded *Best Undergraduate Poster Presentation* at the 2025 ESS Gala/Symposium; findings are contributing to a peer-reviewed manuscript currently in preparation.

Undergraduate Researcher - Isotope Geochemistry Laboratory Mar 2024 - Jun 2024

Advised by Dr. Bruce Nelson - University of Washington

- Learned techniques involving both purification of targeted elements through column chromatography in a clean sample preparation laboratory and high-precision isotopic analyses using MC-ICPMS.
- Collected preliminary $87\text{Sr}/86\text{Sr}$ isotope data from carbonate rock samples using mass-spectroscopy techniques.

Environmental Geochemistry Student - Geomicrobiology Laboratory Mar 2024 - Jun 2024

- Assessed natural waters for contamination and quality parameters (pH, dissolved oxygen, conductivity, temperature), alkalinity, iron (II and III), dissolved organic carbon, coliform bacteria.
- Performed alkalinity titrations, spectrophotometric analyses, and adsorption experiments relevant to low-temperature geochemistry.
- Gained experience in geochemical modeling softwares, PHREEQC and Equilibrium Diagrams, to model data found in environmental analyses. Reported findings, methods, and interpretations in cohesive laboratory reports.

Presentations and Publications

-
- **Robillard, S.**, Heitmann, E.O., Germeau, H., Leite, M., Schauer, A., Huntington, K.W. (in prep). Formation Processes and Environments of Miocene Lacustrine Carbonates: Petrographic and Isotopic Implications for Paleoclimate Reconstruction on the Colorado Plateau, Seattle, WA, USA.
 - Heitmann, E.O., Huntington, K.W., **Robillard, S.**, Fischer, L., Jorgensen, A., Mat, S., Leite, M., Brigham, C., He, J., Douglass, J., Cassel, E., Gootee, B., Schauer, A. (in prep). Lacustrine carbonate isotope stratigraphy of the Miocene Bidahochi Formation records both short-term and long-term change, Navajo Nation, AZ, USA.
 - **Robillard, S.**, Heitmann, E.O., Germeau, H., Huntington, K.W., Schauer, A., Leite, M. (2025). Petrographic and Isotopic Constraints on the Processes and Environments of Miocene Lacustrine Carbonate Formation on the Colorado Plateau, Geological Society of America Connects 2025, National Conference, San Antonio, TX. (Poster)

Honors and Awards

- Earth & Space Sciences Departmental Honors Program 2024 - Present
- Afton Woolley Crooks & James William Crooks Endowed Scholarship April 2025
in Geological Sciences - \$13,407
- “*Rising Rockstar*” Best Undergraduate Poster Presentation - \$200 April 2025

Service and Outreach

- Volunteer** - UW Rockin’ Out Outreach K-12 Jan 2025 - Present
- Design and lead engaging Earth and space science lessons, incorporating hands-on demonstrations to inspire curiosity and foster a deeper understanding of geoscience concepts.
 - Make complex topics accessible and exciting, encouraging students to ask questions, think critically, and explore their own scientific interests.
 - Create an inclusive and supportive learning environment, ensuring that students of all backgrounds feel empowered to engage with science and see themselves as future scientists.

- Field Assistant** - UW Department of Earth & Space Sciences Sept 2025
- Measured 50+ meters of stratigraphic sections in the Wenatchee Formation and created stratigraphic columns from detailed notes and drawings done in the field.
 - Collaborated with a small team to interpret the sedimentary rock record, collect samples for analysis, and record detailed outcrop observations.

- Teaching Assistant - Introduction to Geology (ESS 101)** Dr. Terry Swanson Jan 2025 - Mar 2025
- Volunteered in weekly lab sections, aiding 20+ students' comprehension of geologic concepts and providing feedback on lab assignments. Met weekly with teaching staff to discuss lesson plans, field trips, and criteria for grading lab exercises.

- After School Program Leader** - Isla Vista Elementary School K-6 Oct 2022 - Jun 2023
- Organized educational enrichment activities for 30+ elementary students, including founding a "Science Club" to conduct hands-on physics and chemistry experiments.

Professional Skills

Software Proficiency

- Python
- ArcGISPro
- PHREEQC
- HTML & CSS
- CloudCompare
- VSCode

Specialized Coursework

- Isotope Geochemistry
- Environmental Geochemistry
- Materials Science
- Advanced Calculus
- Mechanics/Electromagnetism
- Sedimentary Geology

Languages

- English (Native)
- French
